The California Heart Rhythm Symposium 2022

Saturday, September 10, 2022

UCLA Luskin Conference Center
Los Angeles, California
OVERVIEW AND TARGET AUDIENCE

The California Heart Rhythm Symposium aims to bring together leaders in the field of cardiac arrhythmias to provide a forum for presentation and discussion of the latest advances in the field with practicing cardiac electrophysiologists, cardiologists, internists and allied professionals.

The meeting will highlight how understanding of basic mechanisms and new advances are translated into clinical practice and explore how understanding clinical problems have created new avenues for research and therapeutics. This focused interactive program will emphasize clinical conditions encountered in everyday practice.

EDUCATIONAL OBJECTIVES

At the end of this meeting, participants will be able to:

• Discover the latest advances in the understanding of cardiac arrhythmias
• Recognize how these advances are translated into new medical and interventional treatments
• Identify how these treatment advances can be applied to their clinical practice

NEEDS ASSESSMENT

The content of this educational activity was determined by rigorous assessment of program feedback from prior California Heart Rhythm symposia, expert faculty assessment and new medical knowledge in the field.

TARGET AUDIENCE

Practicing cardiac electrophysiologists, cardiologists, internists, physicians in training, nurses, technicians and associated professionals.
