The 10th Annual UCLA Diabetes Symposium

Diabetes poses a major healthcare challenge given its rising prevalence, cost, and risk of chronic complications and co-morbidities. Healthcare providers are required to address these concerns in a changing landscape of therapy and technology where treatments for diabetes continue to expand. The annual UCLA Diabetes Symposium is a full-day CME program offering providers of varying backgrounds a chance to review optimal state-of-the-art patient care. Experts in the field will review current best practices, including updates in care, guidelines, and new medication classes, as well as address co-morbidities including non-alcoholic fatty liver disease and chronic kidney disease.

Course Objectives

At the completion of this course, participants should be able to:

- Utilize the latest diabetes guidelines in the management of type 2 diabetes mellitus
- Counsel patients with diabetes on cardiovascular disease prevention
- Understand the role of insulin, SGLT-2 Inhibitors, GLP-1 Receptor Agonists and GLP/GLP-1 Receptor Agonists in management of type 2 diabetes mellitus
- Understand cultural disparities in diabetes care
- Understand how diabetes and non-alcoholic fatty liver disease (NAFLD) are connected
- Recognize diabetes kidney disease and its treatment options
- Discuss the differences between type 1 diabetes and latent autoimmune diabetes in adults

Target Audience

The UCLA diabetes program has been designed for physicians, nurse practitioners, physician assistants, certified diabetes educators, nurse educators, dietitians, pharmacists, and other healthcare practitioners whose practice includes care of patients with diabetes.

Disclosure
The FDA has issued a concept paper which classifies commercial support of scientific and educational programs as promotional unless it can be affirmed that the program is “truly independent” and free of commercial influence. In addition to independence, the FDA requires that non-promotional, commercially supported education be objective, balanced, and scientifically rigorous. The policy further states that all potential conflicts of interest of the CME staff and faculty be fully disclosed to the program's participants. In addition, Accreditation Council for Continuing Medical Education policy mandates that the provider adequately manage all identified potential conflicts of interest prior to the program. We, at UCLA, fully endorse the letter and spirit of these concepts.
