present

17th Annual HIV CME Symposium

Tough Decisions Made Easier

Clinical Management of Treatment-Experienced Patients

Tuesday, December 17, 2019
8:00 am — 3:30 pm
UCLA Covel Commons - Los Angeles, California

Chairs:
Ronald T. Mitsuyasu, MD & Judith S. Currier, MD

This program is sponsored by the Office of Continuing Medical Education, David Geffen School of Medicine at UCLA
Registration

Application for Enrollment (Please Print)

December 17, 2019

Tough Decisions Made Easier:
Clinical Management of Treatment – Experienced Patients

Amount

$45

Name (First/Middle/Last) _____________________________________________________

Degree

Preferred Mailing Address _____________________________________________________________

City/State/Zip_______________________________________________________________________

Daytime Phone: ____________________________ Fax: ___________________________________

E-mail: ____________________________________________________________________________

Organization Affiliation: ____________________________ Specialty: __________________________

Check enclosed payable to: The Regents of the University of California

Charge: ☐ MasterCard ☐ Visa ☐ Discover ☐ AMEX

Credit Card No. _________________________________________________________________

Expiration (Mo/Yr) _________________________________

About the Los Angeles Region Pacific AIDS Education Training Center

The Los Angeles Region Pacific AIDS Education and Training Center (LA PAETC) provides direct educational services to a broad range of health providers in Southern California and has developed web-based learning modules available at https://hivtrainingcdu.remote-learner.net/. The PAETC also sponsors a free telehealth HIV mentoring program for HIV clinical care teams and individual clinicians that can be found at: http://paetc.org/contact-us/hiv-learning-network/.

The LA PAETC provides HIV providers (physicians, physician assistants, nurses, nurse practitioners, dentists, dental hygienists, pharmacists, case managers, mental health providers and others) with the knowledge and skills necessary to care for HIV-infected patients and increases the number of trained primary care professionals working with HIV-infected patients in the community. Training programs are designated by level, according to the experience, knowledge and needs of trainees.

The AIDS Education and Training Centers also offer a national AIDS “Warmline” consultation service for physicians, pharmacists and other health professionals (800-933-3413) as well as a 24-hour hotline (888-448-4911) for Post-Exposure Prophylaxis (PEP) and a National Perinatal HIV Consultation and Referral Service (800-448-8765). Although our experts cannot offer opinions with regard to specific patients, they can respond to general questions with regard to diagnosis and management. For more information on the LA PAETC, please call Tom Donohoe at (310) 794-8276.

About the UCLA AIDS Institute

In 1981, UCLA physicians reported the very first cases of what they described as “newly acquired immunodeficiency”—what we now know as AIDS. These doctors’ discovery and the subsequent exponential explosion of AIDS cases in Los Angeles and elsewhere around the country and around the world, led to the formation of the widely-acclaimed UCLA AIDS Institute in 1992. Under the direction of Dr. Irvin S.Y. Chen, an internationally respected virologist, the UCLA AIDS Institute provides a multidisciplinary think-tank for top-flight researchers who are assailing HIV on many fronts.

Institute members include faculty who work in the fields of virology and immunology, genetics, cancer, neurology, ophthalmology, epidemiology, social science, public health, nursing, and disease prevention. Their studies are carried out at the UCLA Westwood campus, in community settings, at half a dozen major medical centers in greater Los Angeles, and at scores of locations in India, China, Brazil, and sub-Saharan Africa.

Through laboratory research leading to new treatments for HIV, providing outstanding care to patients with HIV and developing more effective prevention strategies, the UCLA AIDS Institute is leading the worldwide effort to eradicate HIV and AIDS. The Institute’s dedicated scientists are committed to developing more effective education and prevention strategies for at-risk communities around the world, and better treatments for all people living with HIV. Innovative research programs that aim to develop a safe and effective HIV vaccine are among the UCLA AIDS Institute’s very highest priorities.

Program Agenda

Morning

8:00  Registration & Continental Breakfast
8:30  Greeting – Judith S. Currier, MD
8:45  Drug Interactions: What Clinicians Need to Know in the INSTI Era - Kimberly Scarsi, PharmD
9:15  Questions & Answers
9:30  Update on Substance Misuse in HIV Settings - Steven Shoptaw, PhD
10:00 Questions & Answers
10:15 Break
10:30 Non-Communicable Diseases and HIV - Judith S. Currier, MD
11:00 Questions & Answers
11:15 Complicated Cases in PrEP and STDs - Raphael J. Landovitz, MD, MSc
11:45 Questions & Answers
12:00 Lunch

Afternoon

1:15  Caring for Women with HIV: Treatment Considerations in the Integrase Era - Risa Hoffman, MD
1:45  Questions & Answers
2:00  Challenging Cases in HIV Management - Case Presentation - Eric S. Daar, MD
3:00  Questions & Answers
3:30  Closing – Ronald T. Mitsuyasu, MD
Course Objectives

This one-day symposium is designed to provide participants with relevant, reliable, up-to-date information on the clinical management of HIV-infected patients who have failed one or more antiretroviral regimens, or who have demonstrated some degree of resistance to one or more antiretroviral drugs or classes of drugs. At the conclusion of the course attendees should be able to:

- Identify the roles that viral fitness, viral load and host immunity play in the management of extensively pretreated patients.
- Identify the clinical utility of genotypic and phenotypic resistance assays, and incorporate the data derived from such assays into their decision-making process.
- Utilize the full range of therapeutic options, including newly approved and investigational drugs for patients who have failed one or more multidrug antiretroviral regimens.
- Treat some of the long-term complications of chronic HIV infection.

About the Center for Clinical AIDS Research and Education

UCLA has been a leader in AIDS and HIV-related research, education and patient care since 1981 when the nation’s first cases of AIDS were identified at the UCLA Medical Center. The UCLA Center for Clinical AIDS Research and Education (CARE Center) was established in 1990 to facilitate clinical research and to integrate current research findings with teaching and patient care.

The UCLA CARE Center manages an outpatient clinic dedicated to patients with HIV and maintains an active clinical research program, which evaluates new antiretroviral therapies and investigates diseases associated with HIV and the complications of therapy. It is one of the original sites of the Adult AIDS Clinical Trials Group (ACTG) and the AIDS Malignancy Consortium (AMC). An education and outreach program disseminates information on AIDS and HIV infection to healthcare providers and to the community.

The CARE Center is also a primary location for training of medical students and housestaff at the David Geffen School of Medicine at UCLA in the optimal care of patients with HIV.

The UCLA CARE Clinic location:

Our administrative offices are located at:
1399 S. Roxbury Drive, Suite 100  11075 Santa Monica Blvd., Suite 100
Los Angeles, California 90035  Los Angeles, California 90025
(310) 557-2273                                               (310) 825-6689

Accreditation
The Office of Continuing Medical Education, David Geffen School of Medicine at UCLA, is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

The Office of Continuing Medical Education, David Geffen School of Medicine at UCLA designates this live activity for a maximum of 5.25 AMA PRA Category 1 Credit(s)™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Disclosure
The FDA has issued a concept paper that classifies commercial support of scientific and educational programs as promotional unless it can be affirmed that the program is "truly independent" and free of commercial influence. In addition to independence, the FDA requires that non-promotional, commercially supported education be objective, balanced and scientifically rigorous. The policy further states that all potential conflicts of interest of the CME staff and faculty be fully disclosed to the program's participants. We at UCLA fully endorse the letter and spirit of these concepts.
