UCLA Department of Obstetrics and Gynecology

Presents

3rd Annual

UCLA Advanced Robotic Techniques in Gynecology

Friday & Saturday
October 24-25, 2014

Ronald Reagan
UCLA Medical Center
Tamkin Auditorium
Los Angeles, California
Mail Application for Enrollment (please print)

Fees are as follows:

- Pre-registration: □ $495, physicians  □ $345, nurses and residents
- On-site: □ $520, physicians  □ $370, nurses and residents

Tuition includes registration in the program, syllabus, continental breakfast, break, lunch, & reception.

Will you be attending the cocktail reception following the program on Friday? □ Yes □ No

Last four digits of your Social Security Number

Name (First/Middle/Last) □ Male □ Female Degree

Specialty

Preferred Mailing Address

City/State/ZIP

Office of Continuing Medical Education
David Geffen School of Medicine at UCLA
UCLA Advanced Robotic Techniques in Gynecology
10920 Wilshire Blvd., Suite 1060
Los Angeles, CA 90024-6512
Course Overview:
The 3rd Annual UCLA Advanced Robotic Techniques in Gynecology will be a dynamic combination of lectures, pre-recorded surgical videos, and panel discussions. It will highlight a hands-on experience with the robotic 3-D simulator and robotic dual console platform. The focus will be on the core applications of robotics in pelvic surgery. Presentations will address the simple 30-minute hysterectomy, strategies for robotic myomectomy and safe morcellation, single site robotic laparoscopy, graduating from simple to complex cases, robotics in gynecologic cancer, and treatment of pelvic organ prolapse with sacrocolpopexy. Faculty will also present a spectrum of practical tips, including patient positioning and a variety of docking techniques to improve efficiency as well as how to avoid common pitfalls and maximize patient safety. The symposium will emphasize interaction between participants and faculty allowing ample time for case presentations and panel discussions in order to ensure an outstanding educational and practical experience for attendees.

Target Audience:
Practicing gynecologists, gynecologic oncologists, urogynecologists, urologists, residents and fellows in training

Learning Objectives:
Upon completion of this activity, participants should be able to:

- Identify the ways to achieve the best patient outcomes while utilizing the most efficient robotic techniques
- Consider relevant issues related to operative techniques, complications and functional results of robotic-assisted laparoscopic surgery for:
  - Benign, simple and complex gynecologic conditions
  - Fibroids
  - Women with pelvic organ prolapse
  - Gynecologic malignancies
- Identify how to prevent and avoid common intraoperative complications and how to manage them when they occur
- Understand the financial and practical implications of integrating robotic surgery into practice

Course Faculty

David Geffen School of Medicine at UCLA Faculty:

Course Chair
Christopher Tarnay, MD, FACOG
Director, Division of Female Pelvic Medicine and Reconstructive Surgery
Department of Obstetrics & Gynecology

Course Co-Chair
Amer Karam, MD, FACOG
Associate Clinical Professor
Associate Director Division of Gynecologic Oncology
Stanford Hospital and Clinics

UCLA Faculty:
Erik P. Dutson, MD, FACS
Chief, UCLA Section of Minimally Invasive and Bariatric Surgery
Associate Professor of Surgery
Executive Medical Director, CASIT

UCLA Faculty:
Judith Turner, MD
Associate Clinical Professor
Residency Program Director
Department of Anesthesiology

Visiting Faculty:
Howard Salvay, MD, FACOG, FACS
Chair Department OB/GYN Sutter Maternity and Surgery Center
Director Robotic Surgery Sutter Maternity and Surgery Center
Santa Cruz, Calif.

Dan S. Veljovich, MD, FACOG, FACS
Associate Clinical Professor
Department of Obstetrics and Gynecology
University of Washington
Gynecologic Oncologist, Pacific Gynecology Specialists
Seattle, Washington
Christopher Tarnay, MD, FACOG | Course Chair

Dr. Christopher Tarnay is the Director of the Division of Female Pelvic Medicine and Reconstructive Surgery at the David Geffen School of Medicine at UCLA. Dr. Tarnay has extensive experience in minimally-invasive pelvic surgery and is an accomplished educator in the field of Urogynecology. He specializes in both vaginal and laparoscopic surgical techniques. He Co-Chairs the Committee on Robotic Surgery for UCLA Health System and helped introduce gynecologic robotic surgery to Southern California at UCLA performing robotic hysterectomies and sacrocolpopexies since 2007. His current research interests include health outcomes research in robotic surgery, medical education, and treatment of genitourinary fistula.

Amer Karam, MD, FACOG | Course Co-Chair

Dr. Amer Karam attended medical school at the American University in Beirut. He completed his internship and residency at the Johns Hopkins Hospital in Baltimore, Maryland, a fellowship in gynecologic oncology at the University of California Los Angeles and a fellowship in breast surgery at the Memorial Sloan-Kettering Cancer Center. Dr. Karam has a vested interest in minimally invasive and robotic surgery with a practice centered on this approach for the treatment of patients with gynecologic malignancy and complicated pelvic surgery. He is currently an associate clinical professor at the Stanford Hospital and Clinics and Director of Robotic Surgery and Outreach in the Division of Gynecologic Oncology.

Erik P. Dutson, MD, FACS

Dr. Erik Dutson attended medical school at Eastern Virginia Medical School. After completing medical school, he remained in Norfolk, VA to complete his general-surgery-residency training. Seeking to further his excellent clinical experience, he worked for one year as a Locum Tenens surgeon, which gave him the opportunity to participate in a variety of practices in different hospitals all over the country while helping out communities. An increasing interest in advancing surgical technologies guided Dr. Dutson to Strasbourg, France, where he worked for two years as a clinical and research fellow at the European Institute for Telesurgery at the University of Louis Pasteur. Upon returning to the United States, he joined the newly formed Minimally Invasive Section of UCLA’s Department of Surgery in September 2003. He presently serves as the Executive Medical Director of UCLA’s Center for Advanced Surgical and Interventional Technology (CASIT), a multidisciplinary laboratory with participation by the UCLA Schools of Medicine, Engineering, Computer Science, and Applied Mathematics. He is a regular panel reviewer for NASA’s National Space Biomedical Research Institute.

Howard Salvay, MD, FACOG, FACS

Dr. Howard Salvay graduated David Geffen School of Medicine in 1976 and completed residency at Kaiser Hospital Sacramento. He is director of Robotic Surgery and Minimally Invasive Gynecologic Surgery and Chair of OB/GYN at the Sutter Maternity & Surgery Center, Santa Cruz, a Division of the Palo Alto Medical Foundation. His interests are Single Incision Surgery, Reduced Port Surgery, and Robotic Surgery. Additionally he has innovated techniques of contained morcellation for specimen removal so valuable in the present environment. Dr. Salvay was witnessed and participated in the evolution of Advanced Minimally Invasive Gynecologic Surgery for over 30 years. His experience and video library demonstrate common and unique challenges along with the surgical techniques needed to approach the range conditions encountered in a benign gynecological practice.
Judith Turner, MD, PhD

Dr. Judi Turner graduated from the David Geffen School of Medicine at UCLA and completed her residency training at UCLA in anesthesiology in 2006. Dr. Turner is the residency program director for anesthesiology. She specializes in anesthesia for liver transplantation and obstetrics and gynecology, and is the former chief of service for bariatric anesthesia. Dr. Turner assists faculty at each of the UCLA medical campuses in the perioperative assessment and anesthetic management of patients undergoing robotic surgery at UCLA.

Dan S. Veljovich, MD, FACOG, FACS

Dr. Dan S. Veljovich initiated the first robotic gynecologic oncology program in the Pacific Northwest in 2006 and began training fellows and residents in this minimally invasive platform later that year. He published the first paper in the peer-reviewed literature evaluating the use of robotic surgery in endometrial cancer staging in 2008 and has lectured on the topic for the Society of Gynecologic Oncology and the European Society of Gynecologic Oncology. He enjoys pushing the envelope with this new technology and teaching techniques to residents and fellows from the University of Washington at Swedish Medical Center in Seattle, Washington.

Program Schedule

Friday, October 24, 2014

11:30  Registration and Lunch
12:00  Welcome
      Gautam Chaudhuri, MD, PhD, Christopher Tarnay, MD, Amer Karam, MD
12:15  Robotics in the Media: Controversies and Clarity
      Christopher Tarnay, MD, FACOG
12:45  How to Make a Simple Case Efficient
      Amer Karam, MD, FACOG
1:15   Pre-recorded Video: 30-Minute Hysterectomy
      Amer Karam, MD
1:45   Complications of Robotic Hysterectomy: How to Avoid Them
      Daniel Veljovich, MD
2:30   Break
2:45   Single Incision Surgery and LESS
      Howard Salvay, MD, FACOG, FACS
3:15   Anesthetic Considerations: An Update from Behind the Drape
      Judith Turner, MD
3:45   Application of Surgical Simulation: Training for Quality?
      Erik P. Dutson, MD, FACS
4:30   Adjourn and Welcome Reception
      Drinks and Hors d’oeuvres

Accreditation
The Office of Continuing Medical Education, David Geffen School of Medicine at UCLA is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

The Office of Continuing Medical Education, David Geffen School of Medicine at UCLA designates this live activity for a maximum of 10.5 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Disclosure Statement
The FDA has issued a concept paper which classifies commercial support of scientific and educational programs as promotional unless it can be affirmed that the program is “truly independent” and free of commercial influence. In addition to independence, the FDA requires that non-promotional, commercially supported education be objective, balanced, and scientifically rigorous. The policy further states that all potential conflicts of interest of the CME staff and faculty be fully disclosed to the program’s participants. In addition, Accreditation Council for Continuing Medical Education policy now mandates that the sponsor adequately manage all identified potential conflicts of interest prior to the program. We, at UCLA, fully endorse the letter and spirit of these concepts.

Parking
Please park on the rooftop of Lot 8. A parking attendant will be on duty at the gate entrance from 11:00 am to 1:00 pm on Friday, October 24, 2014 and from 7:00 am to 9:00 am on Saturday, October 25, 2014. For arrivals outside of these timeframes, please report to the parking kiosk on Westwood Plaza to pay for your parking permit. Parking is $12 per vehicle.

Accommodations
W Hotel - Westwood
930 Hilgard Avenue
Los Angeles, CA 90024
Phone: (310) 208-8765

Hilgard House
927 Hilgard Avenue
Los Angeles, CA 90024
Phone: (310) 208-3945

Directions
From the 405 freeway, exit Wilshire Blvd. East toward Westwood. Travel past Charles E. Young Dr. South and turn left on the Structure 8 driveway. Drive up the ramp to the rooftop level to park. The Ronald Reagan UCLA Medical Center is located on the corner of Westwood Plaza and Charles E. Young Dr. South.

Additional Information
If you have any questions, please contact the UCLA Office of Continuing Medical Education at (310) 794-2620 or email eayala@mednet.ucla.edu.
